

Ukrainian delegation from

Lyceum 208, Kyiv

Our school was founded in 1972. Now we have more than 600 students. Our school specialized in math and physics.

We believe that a good education consists not only of deep knowledge but also of the warm and friendly atmosphere, where children can study with pleasure, express their opinions easily, cultivate self-dependence, responsibility, self-esteem and respect for others.

We recognize that all students are uniquely talented. Within our exceptionally supportive community, students develop positive relationships and relish the opportunity to realize their individual potential to the full. Through a broad range of experiences in and beyond school, students become confident, optimistic, compassionate and internationally-minded young adults, ready to find their place in the world.

The school aims to enhance students' awareness of their own cultural identity and heritage, whilst deepening their understanding and respect for other peoples, nations and cultures.

We do not maintain we are perfect. We have both: things to improve and things to be proud of. And we are always ready for an overt and honest dialogue, constructive changes and development.
