

Swiss delegation from

Kantonsschule Trogen (KST)

The Kantonsschule Trogen (KST) was founded over 200 years ago, in 1821. It is the only Gymnasium of the Canton Appenzell Ausserrhoden. Our school is located in the village of Trogen, surrounded by mountains, hills and forests.

Our school has eight buildings and around 630 students from all over the canton. Since it is a rather small school, people know each other and there are familiar faces everywhere. Despite its size, the school not only offers classical high school education, but also has a business school and a health/sociology/pedagogy school in which educational training and practical work are combined. The Kantonsschule Trogen has also a very large music department and a special section for talented athletes.
