

On Friday, the 22nd of March, our group of four people: Savva, Ilya, Viktoriia and Dima conducted a workshop about our experience during the European youth forum to share with the teens in our gymnasium. We had a warm-up and later we had an exercise that is connected with conflicts which shows the right way to sort out the conflict, compromise. During our lesson we were talking about mind borders and also had a discussion about it. Then Savva told the class about environmental problems and conducted an exercise. Also we had a short talk about our time in Switzerland and about the forum in general. At the end of the lesson we showed the video. In my opinion students liked the lesson and they were really interested in the topic. They were taking an active part in the discussions and exercises.
