

Event organizers: **Oleh Smihunov, Yegor Kozubenko**
Venue of the project: Svyatoshin gymnasium, **Kyiv**, Ukraine
Date: 4-th April
Participants: students 15-16 years old
Duration: 45 minutes

Report

Ukraine is very beautiful country. We have a lot of natural resources. But in our country people don't know how to use them and how to care about them. We tried to explain that ecology now is one of the biggest problem in Ukraine, and we need to do something.

Introduction

The presentation began with team building exercise. In Switzerland, we found it important, so we played a game named “ Tunnel”.

The concept was of this game was to run as fast as you can through “Tunnel”. In this game you trained your confidence in your teammates. However, student couldn't run because there was a problem that they weren't sure that their friends would raise their hands high enough. But in the end they made it correctly.

After this event students used their phones and tried to discover their “Footprint”.

They were shocked by results.

After this exercise they had 5 minutes to think “how they could change it?” After the exercise we started the discussion. The main topic of our discussion was electric cars. We came up with the idea that now electric cars have a lot of benefits, but 50% of the power they use is “unclear” because it is made from hydro, coal and atomic power stations. It pollutes environment because it's made with “unclear” methods. Second idea was that not many people in Ukraine know that we have enormous problems with ecology. In another hand there are also many Ukrainians who want to improve ecological situation in our country. We do have problems which need our attention!

Conclusion

To sum up, we would like to say that we are very pleased with everything we've done and we were surprised that students enjoyed this type of work. For us, it was a real success. They were very interested in everything we were saying and they tried their best to do everything we asked. Our small team was absolutely sure, that step by step we could make our country and even the world much better.

We brought only good memories from Switzerland. And we understood that future of this world in our hands.
