

MEDIA and FUTURE OF EUROPE

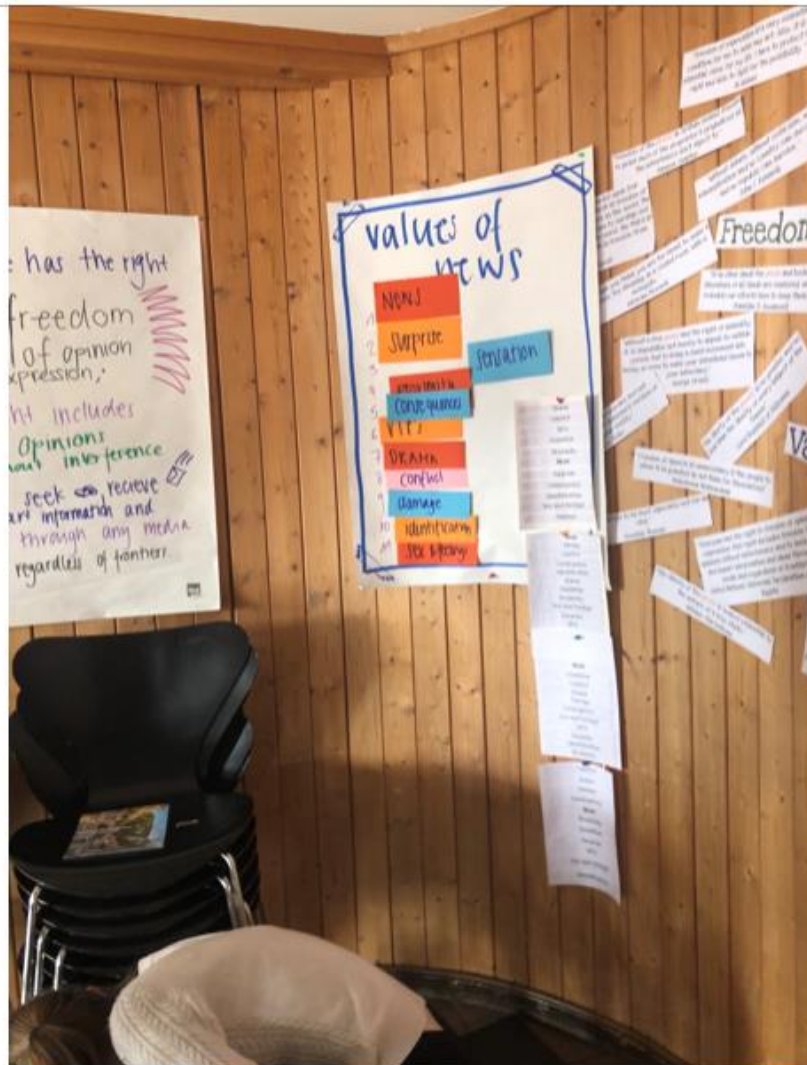

Organizers: Masha, Marta, Lina

Venue of the project: Svyatoshin Gymnasium, Kiev, Ukraine

Date: 4th of April 2018

Participants: Students of 10th grade

Working methods: games, discussions, team building exercises

Concept and mission of the training

In our country media is very corrupted, this why we decided to show the young generation that we have solve the problem and that our future is in our hands. We chose the group of 10th grade because they are in that age, when teenagers' minds are ready to apprehend the wide meaning of this problem. Spreading this methods of study can cause great changes in our society.

Summary

The beginning of our presentation was an introduction of our group and a description of our trip to Switzerland. Firstly, we explained

the meaning of a word “media”. We asked everyone what was media for them and which position did it have in our community.

The first exercise was distribution of values of news nowadays. This exercise could help us see in which condition is the knowledge of our classmates and friends.

The next task was a very interesting game just to relax our students. However, it wasn't so easy as you can think from a first glance. The sense of the game was to check the psychological patience of our mates. There were two rounds: during the 1st round we were wondering around the classroom, while the students were standing without any movements. Their target was not to laugh when we looked in their eyes. In the 2nd round we added different funny noises to make the task even more difficult.

After that, we had started a discussion about the future of Europe. Our students had to provide ideas to improve the situation, which is in EU nowadays. We discussed the ways of making our country's future better and what we can do ourselves to make things change. We wanted to make our friends feel emphatic to the situation, so they would make an effort to change our country, as our teachers in Switzerland did to us.

The last part of our presentation was a team building game with chairs. The task was to put the chairs in a circle and to stand on them in alphabetical order of our names without saying a word. This game was supposed to show the students that together they are able to reach any goal and work as an indestructible team.

Conclusion

To sum up, we wanted to say that our trip to Switzerland had given us a lot of new knowledge about Europe and its media and that we were glad to share this knowledge with our classmates. We all were very satisfied after the presentation and we hope, that special acts will be taken to change our own country for better.
