

Interview with the Hungarians

As we noticed Hungary is a country we don't know very much about, we decided to create an action plan with a context to them.

It was very convenient because we spent the week in Switzerland together in one house and built great relationships, which could also hold on in the future.

That's why we wanted to give the students of the 9th grade the chance to get more informations about the country and their inhabitants.

Our Hungarian friends sent videos to us with a short biography and also with their opinion and perception about the political system in their country, which we shown the students.

After that they got time to search for informations about Hungary on the internet and then they could gave us all the open questions they had.

Soon we realized it's not only Hungary which the students are interested in, they also gave us questions for Latvia, Switzerland, Russia and the EYFT generally, so we extended our project.

We sent these questions to the particular delegations and at our second meeting we talked about the answers and evaluated them in the 9th class.

With the aid of our plan we could gave the students the chance to get an impression from the EYFT without to having been there so far.

They also got informations which are different from the results of their researches and these answers are way more personal.

We hope the students get more clarity and we could convinced them to join the next year in Trogen.
